

IC SRAM 1MBIT 20NS 100TQFP; HT SUSAS CODE:8542320040

Manufacturers	Renesas Technology Corp
Package/Case	TQFP-100
Product Type	Memory
RoHS	Rohs
Lifecycle

RFQ

General Description

The 70V09 is a high-speed 128K x 8 Dual-Port Static RAM designed to be used as a stand-alone 1024K-bit Dual-Port SRAM or as a combination MASTER/SLAVE Dual-Port SRAM for 16-bit-or-more word systems which results in full speed, error-free operation without the need for additional discrete logic. An automatic power down feature controlled by the chip enables (either CE0 or CE1) permit the on-chip circuitry of each port to enter a very low standby power mode.

Features

True Dual-Ported memory cells which allow simultaneous reads of the same memory location

70V09 easily expands data bus width to 16 bits or more

Dual chip enables allow for depth expansion without external logic

Busy and Interrupt Flag

On-chip port arbitration logic

Full on-chip hardware support of semaphore signaling between ports

Fully asynchronous operation from either port

TTL-compatible, single 3.3V ($\pm 0.3V$) power supply

Available in 100-pin TQFP packages

Industrial temperature range (-40C to +85C) is available
