

512K X 8 STANDARD SRAM, 55 ns, PDSO32

Manufacturers	Renesas Technology Corp
Package/Case	SOP32
Product Type	Integrated Circuits (ICs)
RoHS	
Lifecycle

General Description

R1LV0408DSP-5SI is a specific type of semiconductor memory chip manufactured by Renesas Electronics Corporation.

Features

It has a capacity of 4 megabits (4 Mb) or 512 kilobytes (512 KB) of memory.

It uses a low-power CMOS technology, which allows it to consume very little power.

It operates at a clock speed of 5 nanoseconds (5 ns), which means it can perform read and write operations very quickly.

It has a single 3.3V power supply.

Application

R1LV0408DSP-5SI can be used in a wide range of electronic devices that require non-volatile memory, such as routers, switches, modems, and printers.

It is commonly used as a boot memory, where the device reads instructions from the chip during startup.

It can also be used as a program memory, where the device stores application code.
