

# FDMA1028NZ

Data Sheet

20V Dual N-Channel PowerTrench MOSFET; Package: MicroFET; No of Pins: 6; Container: Tape & Reel,MOSFET 20V Dual N-Channel PowerTrench MOSFET

Manufacturers ON Semiconductor, LLC

Package/Case 6-VDFN

Product Type Transistors

RoHS Green

Lifecycle

### **General Description**

This device is designed specifically as a single package solution for dual switching requirements in cellular handset and other ultra-portable applications. It features two independent N-Channel MOSFETs with low on-state resistance for minimum conduction losses. The MicroFET 2x2 package offers exceptional thermal performance for its physical size and is well suited to linear mode applications.

#### **Features**

## **Application**

3.7 A, = = 2.5 V
