## General Description

EPM7256AQI208-10 is a field-programmable gate array (FPGA) manufactured by Intel (formerly Altera).

## Features

- It has a capacity of 256 macrocells
- It has 10ns maximum propagation delay
- It operates at a 3.3V power supply voltage
- It comes in a 208-pin quad flat pack (QFP) package
- It supports in-system programming (ISP) and configuration via JTAG interface

## Application

- Digital signal processing (DSP)
- High-performance computing (HPC)
- Communications equipment
- Video and image processing
- Industrial control systems
- Medical equipment
