

-20V, 200mA, Ultralow Noise, Ultrahigh PSRR Negative Linear Regulator

Manufacturers	<a href="#">Analog Devices, Inc</a>
Package/Case	12-Lead DFN (3mm x 3mm w/ EP)
Product Type	Power Management ICs
RoHS	
Lifecycle

## General Description

The LT3093 is a high performance low dropout negative linear regulator featuring ADI's ultralow noise and ultrahigh PSRR architecture for powering noise sensitive applications. The device can be easily paralleled to further reduce noise, increase output current and spread heat on a PCB.

The LT3093 supplies 200mA at a typical 190mV dropout voltage. Operating quiescent current is nominally 2.35mA and drops to 3 $\mu$ A in shutdown. The device's wide output voltage range (0V to -19.5V) error amplifier operates in unity-gain and provides virtually constant output noise, PSRR, bandwidth, and load regulation independent of the programmed output voltage. Additional features are a bipolar enable pin, programmable current limit, fast startup capability and programmable power good to indicate output voltage regulation. The regulator incorporates a tracking function to control an upstream supply to maintain a constant voltage across the LT3093 to minimize power dissipation and optimize PSRR.

The LT3093 is stable with a minimum 4.7 $\mu$ F ceramic output capacitor. Built-in protection includes internal current limit with foldback and thermal limit with hysteresis. The LT3093 is available in thermally enhanced 12-Lead MSOP and 3mm  $\times$  3mm DFN Packages.

## Features

Ultralow RMS Noise: 0.8 $\mu$ VRMS (10Hz to 100kHz)

Ultralow Spot Noise: 2.2nV/ $\sqrt{\text{Hz}}$  at 10kHz

Ultrahigh PSRR: 73dB at 1MHz

Output Current: 200mA

Wide Input Voltage Range: -1.8V to -20V

Single Capacitor Improves Noise and PSRR

100 $\mu$ A SET Pin Current:  $\pm$ 1% Initial Accuracy

Single Resistor Programs Output Voltage

Programmable Current Limit

Low Dropout Voltage: 190mV

Output Voltage Range: 0V to -19.5V

Programmable Power Good and Fast Start-Up

Bipolar Precision Enable/UVLO Pin

VIOC Pin Controls Upstream Regulator to Minimize Power Dissipation and Optimize PSRR

Minimum Output Capacitor: 4.7 $\mu$ F Ceramic

12-Lead MSOP and 3mm  $\times$  3mm DFN Packages

## Application

RF and Precision Power Supplies

Very Low Noise Instrumentation

High Speed/High Precision Data Converters

Medical Applications: Diagnostics and Imaging

Post-Regulator for Switching Supplies
