## General Description

XCF04SV0G20C is a product of Xilinx, which is a field-programmable gate array (FPGA) device.

### Features

It has a capacity of 4,096 logic cells.

It has 20 I/O pins.

It has a maximum operating frequency of 266 MHz

It supports JTAG programming and in-system reconfiguration.

It operates on a 1.8V power supply.

### Application

XCF04SV0G20C is commonly used in various digital logic applications, such as control systems, signal processing, and data acquisition.

It is used in communication systems, such as networking devices and wireless base stations.

It is used in test and measurement equipment.

It can also be used in aerospace and defense applications.
