## General Description

TDA2822 is a dual power amplifier IC (Integrated Circuit) used for audio amplification. It is commonly used in small portable electronic devices like radios, MP3 players, and other low-power audio applications.

### Features

- Dual power amplifier circuit in a single package
- Low power consumption
- Wide supply voltage range
- Low crossover distortion
- High channel separation
- Short circuit protection

### Application

- Portable audio devices
- Audio equipment
- Intercom systems
- TV sound systems
- Portable radios
- Low power audio applications
