

Analogue Comparator, Rail to Rail, Low Power, 1 Comparator, 1.1 μ s, 850mV to 6V, SC-70, 5 Pins

Manufacturers	ON Semiconductor, LLC
Package/Case	SC-70-5
Product Type	Comparator ICs
RoHS	Rohs
Lifecycle

General Description

The NCS2200 series is an in industry first sub-one volt, low power comparator family. These devices consume only 10uA of supply current. They are guaranteed to operate at a low voltage of 0.85V which allows them to be used in systems that require less than 1.0V and are fully operational up to 6.0V which makes them convenient for use in both 3.0V and 5.0V systems. Additional features include no output phase inversion and overdriven inputs, internal hysteresis, which allows for clean output switching, and rail-to-rail input and output performance. The NCS2200 series is available in the tiny SOT23-5. There are eight options featuring two industry standard pinouts. Additionally, the NCS2200 and NCS2202 are available in the SC70-5 package. The NCS2200 is also available in the tiny DFN 2x2.2 package. The NCS2200A is available in UDFN 1.2x1.0 package.

Features

- Operating Voltage of 0.85 V to 6.0 V
- Rail-to-rail Input/Output Performance
- Low Supply Current of 10 μ A
- No Phase Inversion/Glitchless transitioning in or out of Tri-State Mode
- Complementary or Open Drain Output Configuration
- Available with the Enable Function

Application

ONSEMI
