## General Description

ADG5409BCPZ is a specific model of analog switch IC (integrated circuit) produced by Analog Devices, Inc.

## Features

- It has 4 switches with independent controls
- It operates on a supply voltage range of 1.65V to 5.5V
- It has low on-resistance (0.35 ohms) and low power consumption
- It can handle both analog and digital signals
- It has a small package size (3mm x 3mm LFCSP) for space-constrained applications

## Application

- Audio and video signal routing
- Test and measurement equipment
- Battery-powered devices
- Portable medical equipment
- Industrial control systems
- Communication systems
