General Description

PC28F128P33B85 is a part number for a flash memory device manufactured by Intel.

Features

It has a capacity of 128 Megabits (Mb).

It uses a NOR Flash memory architecture.

It has a 33 MHz clock rate.

It operates on a 1.8V power supply.

It has a standard Parallel NOR Flash interface.

It supports various programming and erasing modes.

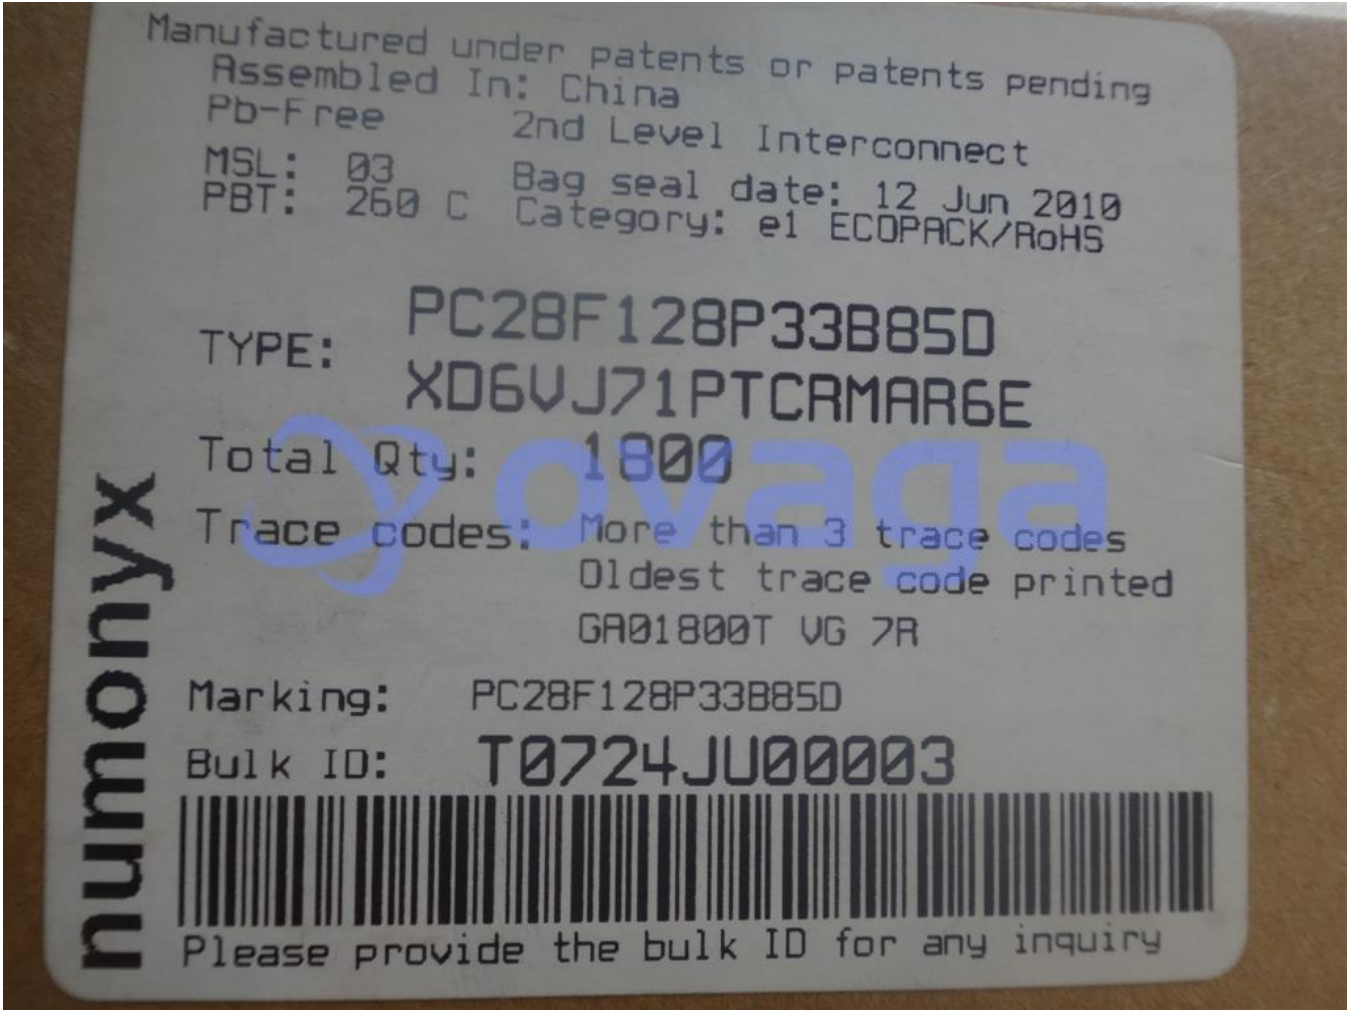

Application

It can be used as non-volatile memory in various electronic devices such as set-top boxes, routers, switches, and other networking equipment.

It can be used in automotive applications such as infotainment systems, telematics, and advanced driver assistance systems (ADAS).

It can be used in industrial applications such as factory automation, robotics, and process control systems.
