## General Description

High Speed (UHS) series of TinyLogic®. The device is fabricated with advanced CMOS technology to achieve ultra-high speed with high output drive while maintaining low static power dissipation over a broad VCC operating range. The device is specified to operate over a very broad VCC operating range. The device is specified to operate over the 1.65V to 5.5V VCC range. The inputs tolerate voltages up to 5.5V independent of VCC operating voltage.

## Application

ONSEMI
