General Description

M27C256B-12F1 is a type of integrated circuit (IC) or memory chip, specifically an EPROM (Erasable Programmable Read-Only Memory) chip. Here are some of its features:

Features

It has a capacity of 256 kilobits (32 kilobytes) of memory.

It operates with a 5V power supply.

It has a access time of 120 nanoseconds (ns).

It is housed in a 28-pin dual-inline package (DIP).

Application

Microcontroller program storage

Instrumentation

Automotive electronics

Industrial control systems

Consumer electronics
